Steubenville, Ohio 43952

August 7, 1981

Attention: Jack Maloney, Plant Engineer

Dear Sir:

This is to reply to your inquiry into the proper disposal of solid waste from your facility. The baghouse dust from your facility is considered a solid waste, where as the slag is exempt from the solid waste regulations. Ohio's solid waste law prohibits the open dumping of solid waste and sets up the procedure for establishing and licensing proper disposal facilities. I have enclosed a copy of the regulations which will be helpful to you if you wish to establish a solid waste disposal facility. The first step in starting a solid waste disposal site is to request a site evaluation. I have also enclosed a request form for a site investigation.

Instead of establishing your own solid waste disposal facility, you may wish to use an already licensed site. If you choose this alternative, you should contact a licensed sanitary landfill to see if they are willing to accept your waste. The landfill operator should then contact the Office of Land Pollution Control to obtain approval for disposing of your specific waste(s).

Please contact Steve Hamlin or myself at the number below if you have any questions.

Sincerely,

Patrick H. Gorman
Solid Waste Scientist
Office of Hazardous Materials Management
